

# Requirements

I need a todo applications where following feature must include.

## Different User

1. Super Admin
2. Admin
3. User

## Features

1. Register new user
2. Login with new user credentials
3. Create new todo
4. View Todos
5. Update todo
6. Delete Todo
7. Create new user
8. Delete User
9. Update User
10. View Users

No one can see other todo list even if this is deleted.

## Permission

Role	Permission
User	1,2,3,4,5,6
Admin	user's and 7,10
Super Admin	Admin's & 8,9

| All the user's can update there own profile.

## Future

I want to scale this project in the future and introduce lot more tool against this system. So ensure high scalability.
